

EXECUTIVE AVIATION SERVICES

FAST AIR LAUNCHES NEW DIVISION IN AIR SERVICE

FOR IMMEDIATE RELEASE:

Winnipeg, Manitoba, September 24, 2003 - Fast Air MedEvac Services is the newest division of Fast Air Ltd. The company has operated a premium air charter service which is well known in the Manitoba business community. "Having flown more than 5 million miles safely over the past 8 years, was a good foundation for this new type of air ambulance service," said Dan Rutherford, director of marketing for Fast Air Ltd. "We have been operating all over Northern Manitoba and the remote North for several years. We felt that our expertise in aviation, matched with an outstanding air medical team would provide a great service for rural Manitobans."

The MedEvac service provides a vital link for all Manitobans to access healthcare services in a large center from their own community. The air ambulance service involves an aircrew and flight nurse being ready to depart on a moment's notice – on a 24 hour basis.

In addition to the Medical King Air 200 (picture attached), Fast Air has executive jets and twin engine aircraft that provide Manitoba Businesses with vital links to customers right across North America.
